#### **Matilija Magic ~ The Delaney & Bonnie Project**

The release and public debut of the trailer to the documentary “Matilija Magic ~ The Delaney & Bonnie Project”

In 1969, music was the voice of a worldwide revolution. Crossing all color lines, music was able to inspire, inform, invoke and unite people that share the common belief that war and violence are not the answer to our problems. From the Vietnam War to the Civil Rights Movement, music changed the world and in turn, the world changed music.

Woodstock was the first time "Americans" were able to organize in that magnitude for a common interest. Had the focus turned from music to revolution, the world would be a different place today. It was that focus, the music, the time in history, which defined a movement and spawned a generation that is now free to be whom ever they want to be.

Behind the scenes of this music revolution, the sex drugs and rock n roll lifestyle showed no signs of bigotry, consuming even the most innocent and gifted musicians. The Delaney & Bonnie project takes you on a spiritual journey through one of the most historic periods of our time. A journey that you will remember for a long time to come.
